Keywords: jaist-e-master-abstract.sty, title, author, school, keywords.

The file `jaist-e-master-abstract.sty` is a LaTeXstyle file for JAIST-specific master thesis abstract. Using the style file is recommended, but not limited.

If you do not use the style file, make sure that your abstract includes the following:

- **title**
- **author's name**
- **school, student number**
- **submitted date**
- **keywords** (2 through 5 is good)
- **copyright notice** (Write "Copyright © *date* by *name* at the left bottom in the first page.)

If you do use the style file, which is in the following directory,

```
/usr/local/share/jaist.texmf/tex/jaist/master/
```

make sure to define the following in the preamble:

```
\title{title}
\author{author's name}{student number}
\school{your school}
\date{submitted date}
\keywords{keywords}
```

Of course, you also need to describe `\maketitle` right after `\begin{document}`.
